

WELCOME TO PHARMSAVER.net™

THE FREE PREMIER PHARMACEUTICAL ORDERING PLATFORM

COMPETITIVE PRICING

"PharmSaver is an amazing alternative when your wholesaler doesn't give you competitive pricing on generic drugs."
Brian S, PA

REMAIN COMPLIANT

"I would recommend their services to anyone who wants to save money, while buying drugs & also remaining compliant with their primary wholesaler."
Kirtan P.

CUTTING EDGE TOOLS

"I especially like the Watchlist tool for shorted items with custom parameters! No other site I have seen offers that."
David, LA

WHY PHARMSAVER?

For more than a decade, PharmSaver has provided the industry's premier pharmaceutical marketplace for independent pharmacies.

PharmSaver gives you an easy-to-use, advanced ordering platform equipped with online tools to maximize rebates that save you time and money. You will quickly experience a trusted marketplace with exceptional pricing, where busy pharmacies can save thousands of dollars monthly and still maintain primary wholesaler contract compliance.

Our platform makes it simple to search for pharmaceuticals and find the best pricing, whether you need a few NDCs or thousands. We can price-check hundreds of NDCs against top wholesalers within seconds, ensuring you always see the best deals.

PharmSaver's team comprises pharmacy and technology professionals with over a century of combined experience. Rest assured, your satisfaction is our top priority.

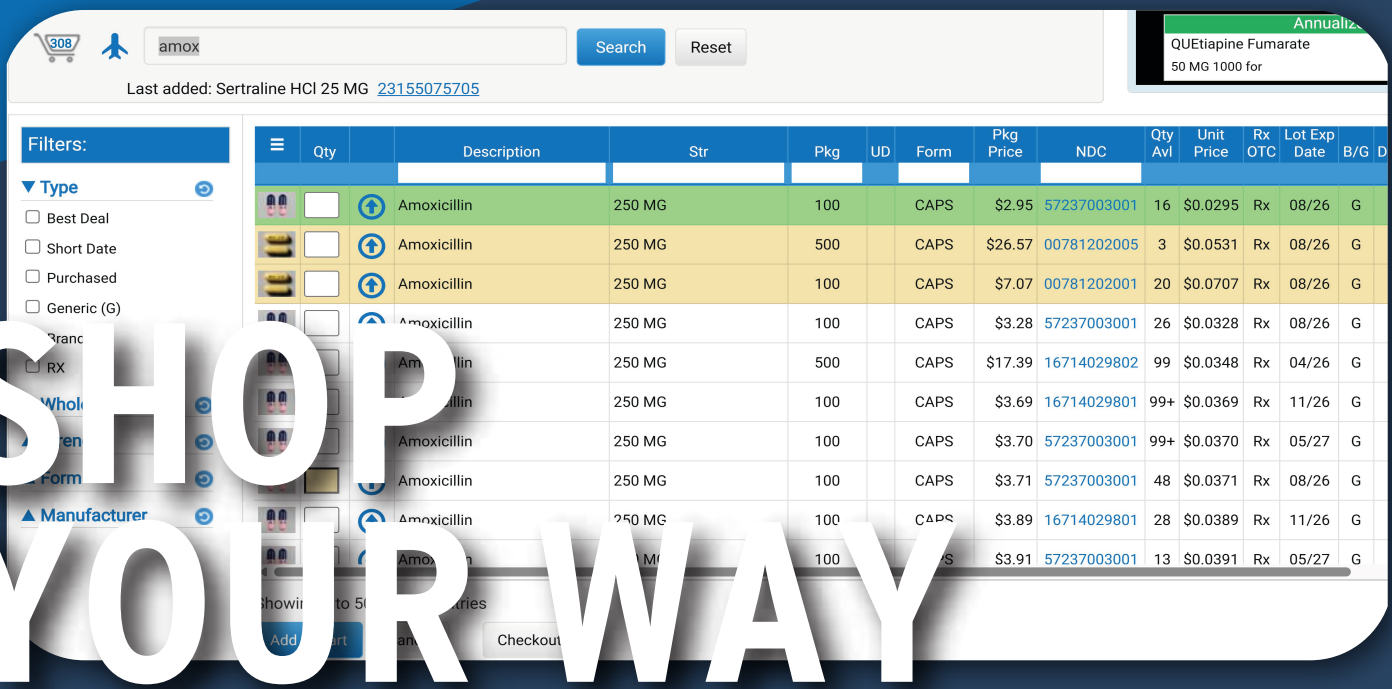

The best part is: we offer all of this for no price to you. PharmSaver is Absolutely Free to use!

Dynamic Marketplace

PharmSaver offers a one-stop shop that connects your pharmacy to a dynamic marketplace of trusted, NABP DDA (Formerly VAWD) accredited wholesalers. We do it in a way that enhances, not restricts your current ordering process.

We have 48,000+ unique NDCs in stock (as of Feb 2025). Goodbye to the old days of shopping each secondary wholesaler separately and spending hours trying to find the best deals.

PharmSaver diligently works to ensure your orders are complete, shipped, and delivered on time. We require wholesalers to update inventory at minimum daily, and most have real-time interfaces so you can be confident items are in stock at the displayed price when you place your order.

SHOP YOUR WAY

You can upload Adobe PDF files by browsing to the file on your PC. Click Upload when you are ready.

1 **Upload Type** PO AmerisourceBergen Corp

2 **File Type** ○ **Excel** ◉ **Adobe PDF** ○ **CSV/Delimited**

3 **Upload File** Choose File No file chosen

Upload

PURCHASE ORDER UPLOADS

While you can search for items individually using our enhanced drug ordering function, PharmSaver introduced the industry's first Primary Wholesaler Purchase Order Upload over ten years ago. We support Adobe PDF, Microsoft Excel, CSV, and plain text documents for seamless uploads.

During the PO Upload process, we compare your primary wholesaler's purchase order against the current pricing from secondary wholesalers. In seconds, we can compare hundreds of pharmaceuticals across more than a dozen wholesaler catalogs to always deliver the best pricing performance.

With PO Upload you get:

- Upload AmerisourceBergen/Cencora, McKesson, Cardinal, Smith Drug and more
- Upload from pharmacy system vendors; ComputerRx, Pioneer, RX30, and more
- Customizable purchasing rules
- Dead net pricing to maximize savings
- Your PO uploads in seconds

Your Pharmacy Purchase Order upload processed in 1 second.

Congratulations! No errors found with 27 items processed.

Click View Cart to see items automatically selected to save you money.

REIMBURSEMENT ALERTS

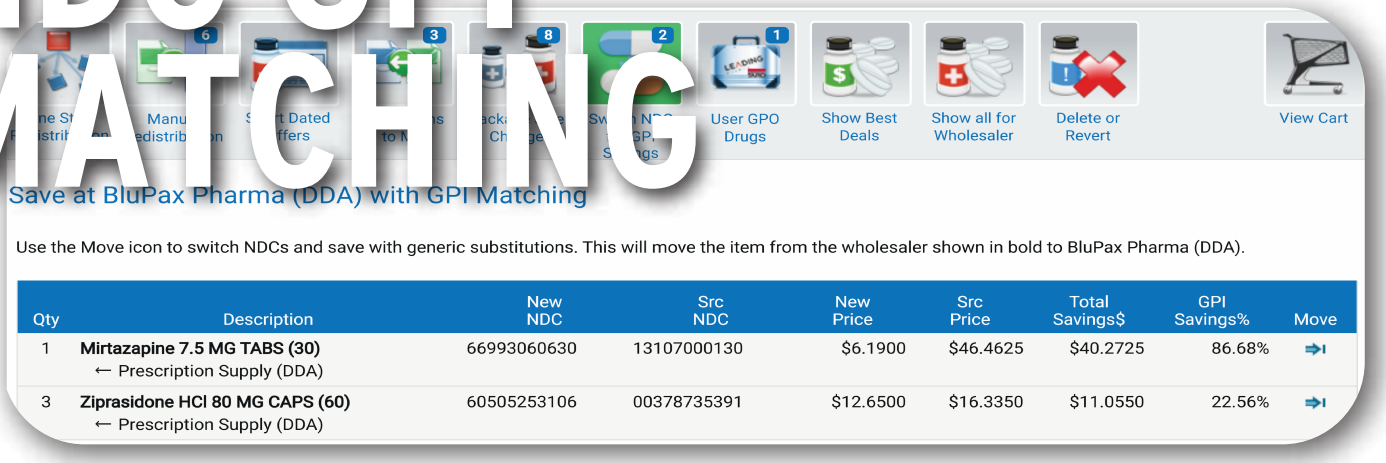

Our Reimbursement Alert and Reimbursement Saver features ensure the drugs you purchase don't squeeze your profit margin. Reimbursement Alert allows you to analyze all items in your purchase order or cart against your choice of "MAC" databases, including State, PDP, and Commercial MAC options. It provides real-time warnings of potential negative margin situations.

Reimbursement Saver takes these negative margin situations and highlights opportunities to turn them into positive margins. During PO Upload, we identify items from your primary wholesaler that exceed the MAC price and switch them to items that still save you money and come in under the MAC price.

- Multiple MAC databases
- Manual or automated switch of NDCs
- Set percent savings for reimbursement override during PO Uploads

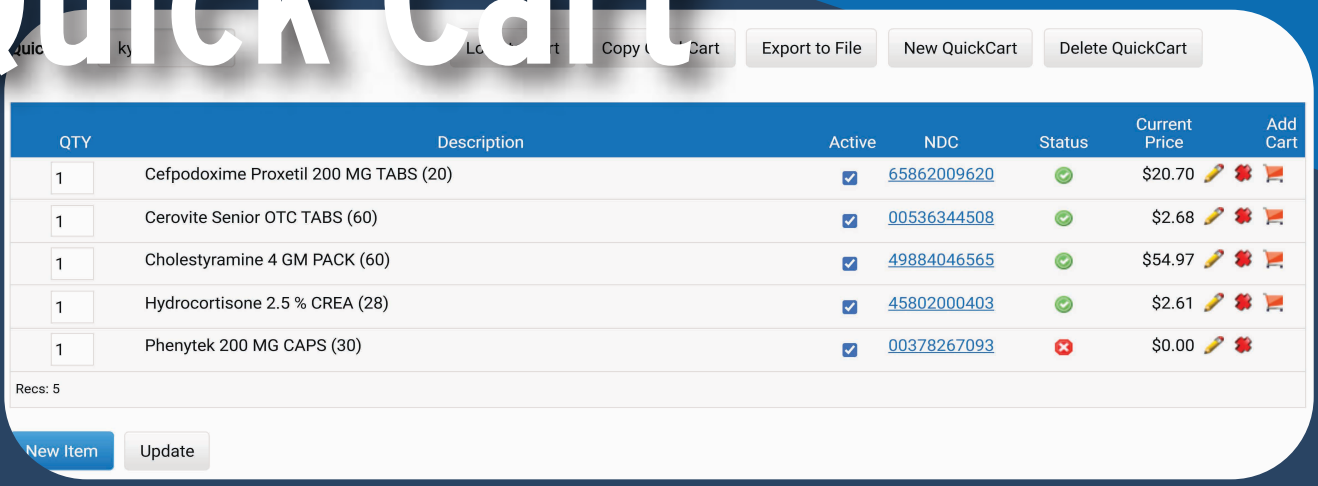

NDC GPI MATCHING

With our GPI matching capability you will always see if another NDC of the same product can generate savings. You will also have the ability to set different savings parameters based on both NDC and GPI matches. The system will only suggest NDC changes with your permission and only if your savings threshold is met.

Quick Cart

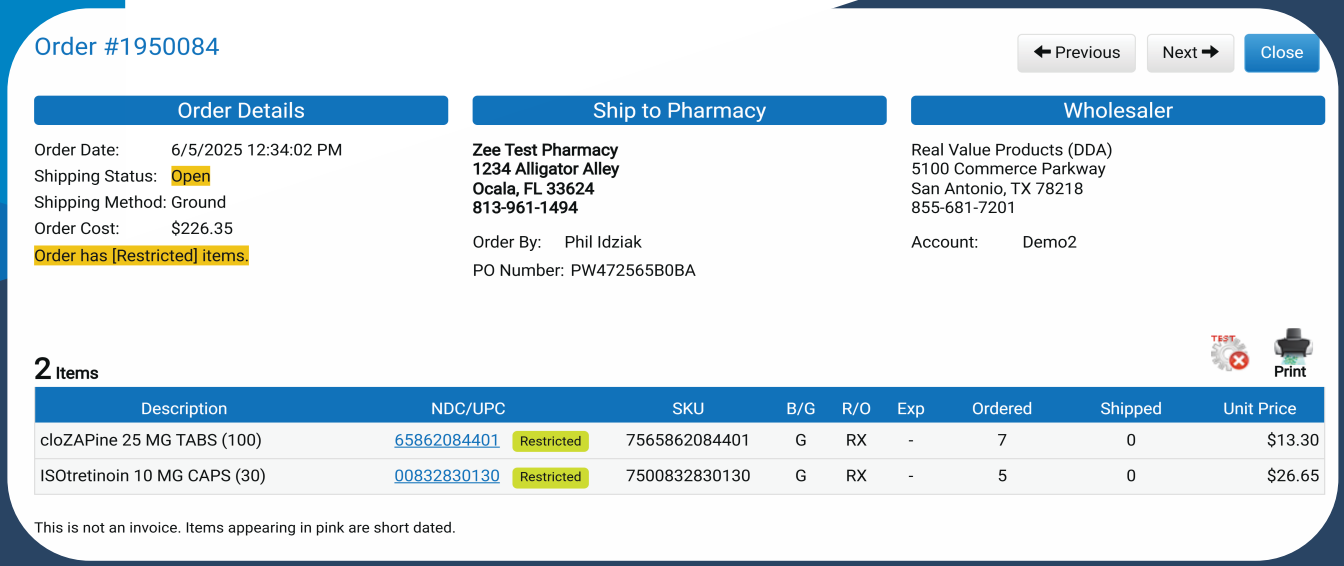

Quick Cart allows you to quickly order high-frequency items. You can create a custom list of items based on their NDC and PharmSaver will find the best prices for each one. Clicking on the Shopping Cart will upload the item with the price shown directly to your cart. By creating a list of commonly purchased items you can save valuable time spent searching.

STREAMLINED REMS

At PharmSaver

We ensure that when your pharmacy orders a REMS drug, you receive it with your regular overnight or ground shipping without delay. To assist pharmacies and provide certification information to our partner wholesalers, we have implemented a REMS enhancement that makes it easy to track certification.

We regularly receive files of pharmacies certified to order REMS drugs. We use your pharmacy's DEA and NPI to determine your status and notify the wholesaler when you place your order on PharmSaver. Once your order is complete, you will see it in your Order History. REMS items will be labeled as "Certified" or "Restricted" depending on their status.

Description	NDC/UPC		SKU	B/G	R/O	Exp	Ordered	Shipped	Unit Price
cloZAPine 25 MG TABS (100)	65862084401	Restricted	7565862084401	G	RX	-	7	0	$13.30
ISOtretinoin 10 MG CAPS (30)	00832830130	Restricted	7500832830130	G	RX	-	5	0	$26.65

This is not an invoice. Items appearing in pink are short dated.

REMS (Risk Evaluation and Mitigation Strategies)

Are programs required by the FDA for certain medications with safety concerns. Overall, the programs seek to mitigate risks and ensure safe use of the medications. Some common drugs under these programs include Clozapine and Isotretinoin.

Exceptional Pricing

It is no secret that independent pharmacies face significant challenges. Low reimbursement rates, PMBs, unpredictable fees, competition with chain and online pharmacies, and finally - a big one - your drug supply pricing.

Too often you spend a good amount of time trying to find the best price on an item. And the best price is not always from your primary wholesaler. That's why we partner with top-notch secondary wholesalers who consistently deliver great pricing on items that are in stock today.

Not only do you see the wholesaler's price on PharmSaver, but we GPI match to see if another NDC of the same product can generate savings. You have the ability to set different savings parameters in both NDC and GPI matches to get suggested or automatic switch based on your parameters.

- Wholesaler Best Price updates daily
- NDC and GPI Matching to find savings opportunities
- Package size change recommendations

Dynamic Marketplace

Short Date Opportunity

We created the Short Date Opportunity Purchasing Module with Datarithm™, an inventory control company. The app analyzes your dispensing history to identify buying opportunities at HUGE savings, often over 80% of regular pricing!

Using the app, you will set purchase parameters such as generic discount and minimum inventory dating. We then calculate not only what products to buy, but how much to buy to maximize your savings. We make it fast and easy for you to find and purchase the best short dated opportunities. But you have to act fast as most items are only available for a limited time.

DATARITHM™ INVENTORY CONTROLLED

Today's Short Date Opportunities

Accelerate your profits! PharmSaver.net and Datarithm have compiled a list of **special short date opportunities** just for your pharmacy. You can take advantage of PharmSaver's tremendous values and Datarithm's precise inventory forecasting to improve your business. Be sure to check often as this list is updated based on item availability. Enter quantity for selected item and click **Add to Cart**.
